Profile

Software Engineer with 2+ years of full-stack development experience across web, mobile, and AI domains. Proficient in React.js, Next.js, Node.js, Express.js, FastAPI, Python, MongoDB, PostgreSQL, LangChain, LangGraph, and AWS. Background in RESTful API design, system design, authentication, CI/CD pipelines, and full-stack system ownership.

Professional Experience

Associate Software Engineer, Flutrr Kolkata, India | October 2024 – May 2026

- Architected and released **Florra AI** from scratch – Flutrr’s proprietary agentic AI for dating – using **LangChain**, **LangGraph**, **Node.js**, **Express.js**, and **MongoDB**, driving a 20% increase in new user signups.
- Developed 20+ RESTful API endpoints for authentication, matchmaking, and messaging using **Node.js** and **Express.js**, optimizing backend performance and cutting average API latency by 18%.
- Served as Project Head for **Homi.ai**, directing technical planning, tech stack selection, and full-cycle product delivery, launching 20% ahead of schedule.
- Spearheaded a 5-member cross-functional team spanning product, design, and engineering to deliver flutrr.com within a 2-week deadline.
- Owned development and upkeep of the company website and Admin Dashboard using **React.js** and **Next.js**, achieving 100% responsiveness and cross-platform compatibility, boosting user engagement by 30%.
- Established frontend testing protocols, code review workflows, **CI/CD** pipelines, and **GitHub Actions**, slashing release cycle time by 30% and lowering post-launch defect rates by 20%.

Full Stack Web Intern, Passionate Solver Technologies Kolkata, India | June 2023 – July 2023

- Delivered a responsive analytics web application using **Next.js**, **Apache ECharts**, and **Tailwind CSS**, improving data visualization clarity by 25%.
- Designed reusable **React.js** UI components and applied frontend design patterns, eliminating code duplication and enhancing long-term maintainability by 15%.
- Participated in agile development cycles involving code reviews, testing, debugging, and technical documentation, lowering reported bug counts by 20% and achieving 100% on-time delivery.

React Native Intern, ABCHI Technologies Pvt. Ltd. Remote | January 2023 – June 2023

- Shipped 10+ **React Native** components for the Glodobaara platform, streamlining user workflows and cutting platform bounce rates by 20%.
- Optimized frontend-backend integration via **REST API** refactoring, increasing data handling efficiency and trimming average response time by 34%.
- Partnered with developers, designers, and QA engineers in an agile environment, accelerating feature release velocity by 15%.

Projects

Rasoi – Restaurant Management System Live Demo

- Built a full-stack restaurant operations system using **Next.js**, **Supabase**, and **PostgreSQL**, featuring 4 role-based dashboards covering the complete dine-in flow from OTP login to billing and review.
- Implemented real-time order synchronization using **Supabase Realtime**, backed by a 9-table **PostgreSQL** schema with Row-Level Security (RLS) policies and RBAC.
- Constructed an owner analytics module on a ~20-endpoint REST API with permission-gated routing via **Next.js** middleware.

ChronoBook – Appointment Scheduling Platform Live Demo

- Launched a Calendly-style appointment scheduling solution using **React 19**, **FastAPI**, and **MongoDB**, with 15/30/60 minute meeting options and public booking links.
- Engineered a slot availability engine with conflict detection across 8 **MongoDB** collections, integrating **Google Calendar API**, **Google Meet**, and Jitsi fallback.
- Configured **JWT** authentication, secure cookie-based sessions, **Google OAuth 2.0**, and an SSE-streaming AI assistant powered by **Gemini** and **FastAPI**.

Bloomloop – Digital Bouquet Gifting Platform Live Demo

- Led Bloomloop from concept to deployment as a solo project using **Next.js**, **Node.js**, and **Supabase**, including the frontend, backend APIs, database schema, and system architecture.
- Created a multi-step bouquet builder, personalized greeting cards, and an ambient music-backed reveal experience secured via unguessable public sharing IDs.
- Deployed a freshness-decay engine, event-driven activity analytics, and a public Bloom Wall gallery across 8+ completed features.

Education

Bachelor of Technology in Computer Science and Engineering KIIT University, Bhubaneswar | 2020 – 2024

- GPA: 8.68

Skills

Languages: JavaScript, TypeScript, Python, SQL, C + +, HTML5, CSS3

Frameworks & Libraries: React.js, React Native, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS

Databases: MongoDB, PostgreSQL, Supabase, Redis

Cloud, AI & Infrastructure: AWS, LangChain, LangGraph, Prompt Engineering, Agentic AI, Vercel, Render, Railway

Tools: Git, GitHub, GitHub Actions, Docker, VS Code, Cursor, Claude

Core Competencies: REST API Development, System Design, SDLC, CI/CD, Authentication & Authorization, Agile Development, Distributed Systems, OOP, Data Structures & Algorithms

Certifications

- Full Stack Development Course – PW Skills
- AWS Cloud Architecture – AWS Academy
- AWS Academy Cloud Foundations
- HackerRank React.js Certification
