Profile

Software Development Engineer (SDE) with expertise in high-scale distributed systems, scalable web applications, and cloud solutions. Skilled in React.js, Next.js, Node.js, Express.js, JavaScript, AWS, and agile development. Driven by scalability, fault tolerance, and AI-driven innovation while solving complex software challenges in fast-paced environments.

Professional Experience

Associate Software Engineer, Flutrr

Kolkata, India | October 2024 – May 2026

- Architected and built **Florra AI** from scratch – Flutrr’s proprietary agentic AI for dating, combining conversational intelligence with matchmaking logic using **LangChain** and **LangGraph**, contributing to a 20% increase in new user signups.
- Engineered backend services for Florra AI and the core platform using **Node.js**, **Express.js**, and **MongoDB**, designing RESTful APIs for authentication, matchmaking, and messaging.
- Led as Project Head for **Homi.ai**, an AI-powered web application – owned system design, tech stack selection (React.js, Node.js, Express.js, MongoDB), and the full project lifecycle, launching 20% ahead of schedule.
- Headed a 5-member cross-functional team spanning product, design, and engineering to deliver the company’s flagship platform **flutrr.com** within 1 month.
- Directed development and maintenance of the website and Admin Dashboard, achieving 100% responsiveness and cross-platform compatibility, increasing user engagement by 30%.
- Established frontend testing, code review, and CI/CD practices (GitHub Actions, Cursor, Claude Code) to streamline release cycles and strengthen code quality across the platform.

Full Stack Web Intern, Passionate Solver Technologies

Kolkata, India | June 2023 – July 2023

- Built a responsive analytics web application using Next.js, Apache Echarts, and Tailwind CSS, improving data visualization clarity by 25%.
- Engineered reusable UI components and applied frontend design patterns, reducing code duplication and improving maintainability by 15%.
- Collaborated in agile sprints – code reviews, testing, and technical documentation – helping reduce defects and ensure on-time delivery of assigned milestones.

React Native Intern, ABCHI Technologies Pvt. Ltd.

Remote | January 2023 – June 2023

- Contributed to development of 10+ front end components for the Glodobaara platform, enhancing user workflows and reducing bounce rates by 20% through improved usability and responsive design.
- Ensured frontend-backend integration, delivering highly optimized API interactions and improving average response time by 34% across key user journeys.
- Collaborated with a distributed team of developers, designers, and QA engineers in a fast-paced agile environment, using sprint planning and technical documentation to accelerate feature delivery.

Projects

Rasoi – Restaurant Management System

Live Demo

- Built a full-stack restaurant operations platform with 4 role-based dashboards (Customer, Waiter, Kitchen, Owner), covering the complete dine-in flow from OTP login to billing and review.
- Engineered real-time order synchronization across all roles using Supabase Realtime, backed by a 9-table PostgreSQL schema with RLS policies and role-based access control.
- Built an owner analytics dashboard (revenue, top dishes, live order pipeline) and role-protected routing via Next.js middleware, on a stack of Next.js 15, PostgreSQL, and Zustand.

ChronoBook – Appointment Scheduling Platform

Live Demo

- Built a Calendly-style scheduling platform where hosts manage meeting types and weekly availability, and invitees book via public links with zero signup required.
- Engineered a slot engine with conflict detection to prevent double-booking, integrating Google Calendar/Meet, Jitsi fallback, and multi-provider transactional email for confirmations.
- Implemented JWT cookie auth, Google OAuth, and an SSE-streaming AI chat assistant (ChronoBot) on a stack of React 19, FastAPI, and MongoDB.

Kanban Board

GitHub

- Architected a real-time Kanban task management platform using React.js, Context API, Zustand, and Material UI, enabling drag-and-drop workflows that improved task tracking efficiency by 20%.
- Implemented scalable state management and reusable component design patterns, reducing feature-release overhead while maintaining high code quality.
- Built a Node.js/MongoDB backend for persistent board and task storage, with automated CI/CD deployment via GitHub Actions.

Education

Bachelor of Technology in Computer Science and Engineering

KIIT University, Bhubaneswar, India | 2020 – 2024

- GPA: 8.68

Skills

Languages: C, C++, JavaScript, SQL, HTML5, CSS3

Tools: Git, GitHub, Visual Studio Code, Cursor, Claude

Frameworks, Libraries and Databases: React.js, React Native, Next.js, TypeScript, Node.js, Express.js, MongoDB, Supabase, Redis

Cloud/ AI Skills: Amazon Web Services, Prompt Engineering, LangChain, LangGraph, ChatGraph

Other Expertise: Agile, RESTful APIs, Data Structure, Object-Oriented Programming, Distributed Systems

Certifications

- Full Stack Development course - PW Skills
- AWS Cloud Architecture – AWS Academy
- AWS Academy Cloud Formation
- HackerRank – React.js
